High Pile is available in a variety of applications including; imitation of animal furs, plush fabrics as toys, garments and home textiles.

## ARC40

Aksa Rectangular Cut fiber ARC40 is the perfect fiber for artificial fur production. Thanks to its properties, it provides natural brightness, soft touch, warmth and superior resilience in any blend or 100% itself.

### Main Properties:

- ARC40's 1:7 width/length ratio reflects the light similar to animal hair which enables the end product to have natural brightness.
- By its regular and stable rectangular cross-section, ARC40 stays disentangled which helps to obtain natural soft touch.
- ARC40's special production process ensures more advanced resilience to restore the appearance and the orientation on the final product.

#### ARC40 is available as

- Staple Fiber
- Bright, Quarter-dull, Semi-dull, Dull
- 3.3, 5.6, 11, 13.2, 15, 17 and 22 dtex
- 25, 32, 38, 50, 60, 64, 75, 80, 90, 100mm and longer optionally
- Raw white and dyed (color matching service is available)

## AS350

Aksa Extra Dry Shrinkage Fiber AS350 provides more natural appearance and touch for imitation of animal furs, improved resilience in blends, excellent up and down effect for upholstery end-use thanks to its average shrinkage of 33% in hot air which protects the brightness of the final product.

#### AS350 is available as

- Staple Fiber
- Bright, Quarter-dull, Semi-dull, Dull
- 2.2, 3.3 and 5.6 dtex
- 25, 30 and 32 mm
- Raw white and dyed (color matching service is available)
